

Centrifugal Finishing

Machine Type: Turbo 35

**High-Efficiency
Deburring/Polishing**

TRUMLINGSAKTIEBOLAGET

Tekniska specifikationer:

Längd	1200 mm	Behållarens diameter	390 mm
Höjd	1550 mm	Drivmotor	1,5 kW
Bredd	700 mm	Matning	3 x 400 V / 50 Hz

Turbo 35

- The machine consists of an upright work container lined with hot cured polyurethane lining for durability. Tilttable for ease of unloading.
- A rotating disc, driven by an electric motor, creates a powerful vortex movement, slinging the tumbling mass against the container walls for high pressure.
- A manual sieving box separates details and media. The fixed control panel includes electrical equipment and a frequency inverter for speed control.
- The **Turbo 35** has a three-phase connection and includes a dosing pump for water-compound mixture from a nearby container.
